### CAN YOU TOUCH UP YOUR ROOTS DAILY?

There's no harm in using it daily—other than how quickly you'll blow through a bottle. However, both Hazan and Valdes say you won't need to: "Most products stay put until you wash it out, so daily use will not be necessary," says Hazan. Unless you're a daily shampooer, the product will stay put until your next wash day.

## CONTRAST

What is the Difference Between Deodorant and Body Spray  
The main difference between deodorant and body spray is their function. Deodorants give you protection against the odour of sweat while body spray has the function of a perfume, adding fragrance to your body. Deodorants and body sprays are two cosmetic products that help you to smell fresh and fragrant throughout the day. Although both these products help to mask body odour, there are many differences between the two.

- Deodorant is a substance you can use on your body to hide or prevent the smell of sweat. We usually apply deodorant on armpits.
- Body spray is a perfume-like product.

### DEODORANT VERSUS BODY SPRAY

DEODORANT	BODY SPRAY
